# COMPANY PROFILE

## ABOUT US

We specialize in the R&D, Production, and Decoration of high-quality packaging bottles, tubes and the related products, which are applied in Beauty, Personal Care, and Home. We have an extensive range of more than 1,500 standard products. Based on our intensive cooperators and our professional design team, we can have a rapid processing on custom mold design and packaging developing. We always transfer the ideas from life to make our life better and more convenient. It is preferred to offer the hand for you from concept design, toolmaking, to production. Better primary packaging will be for you.

## OUR SERVICE

- **Professional:** We have been engaged in packaging for many years. Has a lots of packaging experience, and packaging technology. We are more professional. Professional service we can provide.
- **R&D ability&Just in time:** Mold development and products sketch making are processed by ourself. We can make any correction and feedback in soon time which supporting by our strong R&D team
- **Creativity:** Keeping creativity in the packaging. We will take the initiative to develop some new products and apply for patents at the same time to protect the rights and interests of our customers.
- **Continuous improvement&management:** Production is under well controlling to keep the quality. Continuous improvement is engraved in our bones. We will process the production and our work based on the ISO management standards and Environmental standards

## NEW PROJECT PROCEDURE

### Review your ideas

we have to know and understand what you want. Then we will check the details and the possibility from idea to production;

### Proposal discussed

Based on your need&design, proposed solutions will be offered. There we will consider the kinds of the decorations, the budget, leadtime, and any possibility; and then the final product sketch and specification you will see;

### Sample, testing, and approval

Based on your final confirmation, we will make the 3D sample, and make the mold sample. You need take the sample for compatibility testing. At last, get the approval;

### Production

All prepared, then arrange the production referring to the schedule;
